

ABT Sportsline 2015 – Press release CW18 **Fun guaranteed: ABT Sportsline’s new European warranty**

After an uprating by **ABT Sportsline** nothing is what it once may have been. Except when we talk about dependability, which with **ABT** is always at production level. “From now on, when you buy an uprating we do not only assume the entire purchase-attendant new car warranty in Germany, Austria, Switzerland and the Netherlands but also in many other European countries – and all this for free,” says CEO **Hans-Jürgen Abt**. The new countries are **Belgium, Luxembourg, Sweden, Norway, Denmark, Finland, Italy and Poland**.

And what is best about it is that **ABT’s** European warranty does not have to be explicitly booked, as it were, but automatically applies to all upratings done by **ABT Sportsline** or one of its authorised partners. The comprehensive coverage will only end two years after first delivery of the respective car or after a mileage of 100,000km. The customizing experts will also assume the factory warranty as described above if the car was uprated later. For example, **ABT’s** two-year warranty will thus cover 15 months if the car is nine month old when being uprated.

For the owners of used cars with an expired factory warranty, **ABT PerfectCar** (available in selected countries) is a perfect option. This follow-up warranty is valid for eight years at max at a total mileage of 120,000km. If there is a damage or defect, to assert your European warranty claim you simply have to notify the “**ABT Service Technik**“ department forthwith.

The ABT European warranty is valid in the following countries:

- Germany
- Austria
- Switzerland
- Netherlands

Beginning from the 1st of May 2015 the ABT European warranty is extended to the following countries as well:

- Belgium
- Luxembourg
- Sweden
- Norway
- Denmark
- Finland
- Italy
- Poland
