**FROM NOVEMBER 2014 ON ALL VEHICLES ARE EQUIPPED WITH A TIRE PRESSURE MONITORING SYSTEM.**

1. Indirectly measuring tire pressure monitoring system: No sensors are needed in the rims, because the measurement is made via the tire circumference.

2. Directly measuring tire pressure monitoring system: The tire pressure monitoring sensors are installed directly in each wheel. Please indicate when ordering whether the vehicle has installed a directly or indirectly measuring system. With a directly measuring system, additional costs are incurred due to the integration of the sensors.
