

ABT Sportsline 2012 – Press release CW44 **A very sporty SUV – the new ABT QS5**

It is a real winner – the **Audi Q5**. Even for the globally largest tuner of cars produced by the Volkswagen Group, this SUV is quite something special. It meets premium standards without showing off; the design is casual and elegant, timeless and assertive. That's why it forms the basis for the **ABT Sportsline** art of engineering.

Currently, there are two basic diesel Audi Q5 versions available. **ABT** has an engine for every type of performance you may want. If you want a very torquey **ABT QS5** because you love a sporty style of driving or want to carry a huge load, choose the 3.0 TDI: Its 630 Nm, after its ABT treatment, make it sort of invincible (standard version: 580 Nm). 282 hp (207 kW) make for more dynamism. In its serial version, this engine has 245 PS (176 kW). A true "saver" is the 2 liter turbo diesel, which after ABT's intervention has 205 hp, up from 177 hp, or 420 Nm, up from 380.

The **ABT QS5** also has a perfect design. The **ABT exhaust system** with its two double pipes shows the SUV's origin, namely the renowned ABT company. We also recommend to use the **CR** and **DR** alloy wheels, available for this elegant SUV in sizes from 20 to 22 inches, as it befits its rank. The Audi Q5 by **ABT** looks impressive wherever you go, be it a golf course or a high-end ski resort. But this versatile sports car wants to be driven, which, needless to say, you can also tell simply by looking at it: the front grille and spoiler express self-confidence and standing, the fender extensions and door strip attachments dominance. The rear skirt set and rear wing stand for so much more than just a touch of sportiness.

To make the SUV easy to control, the **ABT** engineers also developed a fine-tuned package to lower the car's CoG with suspension springs. After all, the new **ABT QS5** is supposed to be fun on all the roads and tracks you may want to take.
