

ABT Sportsline 2015 – Press release CW46 **Faster than an SQ5 TDI plus – the new ABT Super-Q5 has 365 HP**

ABT Sportsline makes the Audi SQ5 even faster than it is: With 365 HP/ 268 kW and an optimised torque of 710 Nm, the Bavarians have topped the SQ5 TDI competition's original 326 HP/ 240 kW. This new power is primarily reflected in these measurements: "From naught to 100 kph in less than 5 seconds and a new top speed of 260 kph." And **CEO Hans-Jürgen Abt** adds: "But that is not all. We also provide quality, which finds expression in our extensive warranty and the most thorough tests, on both the dynamometer and on public roads."

The powerful **ABT Sportsline** car's "body language" says it all. The Aero package includes the front skirt and a new grill, door strip attachments and a rear wing. If you choose the wide version, you will also get the right fender extensions. As bodywork material, PU is used almost exclusively, which, incidentally, is also the OEM's material of choice. Various wheel spacers of between 30 to 70mm per axle make for the right tread and an even more assertive presence – especially if **ABT** height adjustable suspension springs are used as well. These allow for a variable lowering of between 5 and 30mm on the front axle and of between 10 and 35 on the rear.

For this set-up, the **ABT Sportsline** wheels in 20 and 21" are perfect. You can choose between the **CR, DR, ER-C** and **FR**, some of which are even available in different colours.
