

ABT Sportsline 2017 – Press release CW39 **Cool offers for complete winter wheels – ABT GR as additional highlight**

The offer for complete winter wheels from **ABT Sportsline** is perfect for the cold season. It comprises the designs **DR**, **ER-C**, **CR** and **FR** in sizes from 18 to 22 inch. The matching high-performance winter tires are already included in the special offer. Compared to the regular prices, customers can save quite a lot. Independently, the still quite new **ABT GR** is also worth a look. Whether VW Arteon, Tiguan, Audi R8, Q7 A5 or S8: With these alloy wheels, **ABT Sportsline** presents a highlight in 20 or 22 inch for nearly all vehicle classes.

The wheels are available as a cast version **ABT SPORT GR** (20 or 22 inch) and as a high-strength, forged version **ABT HIGH PERFORMANCE GR**. The latter is available in a 20 inch version for the Audi TT RS and the Audi R8, featuring more than 30 percent weight reduction. This results in lower unsprung masses, providing both cars with distinctly more precision during steering and breaking.

For the **ABT SPORT GR**, on the other hand, customers can choose between two paint finishes with a completely different look: either in “matte black” with a diamond-machined surface and a matte clear finish or in “glossy black” with a diamond-machined rim flange. All versions share the design features of ten spokes which bisect towards the rim flange, the recessed hub area and the strongly concave rim base. While the fully diamond-machined surface of the **ABT SPORT GR matte black** creates a high level of plasticity and delicate elegance, the **ABT SPORT GR glossy black** with diamond machining only on the flange appears more aggressive. This effect is even more prominent on the forged **ABT HIGH PERFORMANCE GR** in “black magic”.

If this has piqued your interest, you can configure your Audi or VW with the new **ABT GR** alloy wheels at www.abt-configurator.com without obligation.
