

ABT Sportsline – Geneva Motor Show 2014 press release **ABT elite conveyance– RS6-R with 730 hp and 920 Nm**

When you read 730 hp/537 kW, you may first think of an Italian super-sports-car or a big truck but not of a roadworthy family or business estate. But **ABT Sportsline** is still able to surprise its target group and at the Geneva Motor Show 2014 will present its latest Audi RS6 model, the 320 kph **ABT RS6-R**. “Mind you, the R stands for racy, not for rough or rude,” says CEO **Hans-Jürgen Abt**: “As with the normal Audi RS6, ours also provides the utmost comfort, sumptuousness and usefulness, limited to 25 cars worldwide.”

To turn this high-performance car into a refined gem, ABT uses **ABT Power**. This kit includes the **ABT Engine Control** unit, a specially developed software and a specially adapted stainless steel exhaust system – including a Y-pipe and sport-type catalytic converter – that makes for a superb sound and an even more attractive look with its two double end pipes.

But power isn't everything. In order to make the Avant even more of a sports car, the engineers used an **ABT height adjustable spring kit**. Dunlop high-performance tyres specially selected for the **RS6-R** complete this dynamic set-up. This inviting features may make it hard for some people to accept that this racy **ABT** in Geneva can only be viewed while it is standing still. But that may be just as well, because it makes for a better appreciation of the extensive body kit and the lavish 22-inch **ABT DR** alloy wheels. Selected parts made of exposed red carbon is what all body components have in common: they can be found on the front lip with its blades, air inlet covers including flics, side skirt attachments with side blades and the rear skirt. Mirror caps, fender inserts and a rear spoiler complete the imposing look.

And since passengers would find it difficult to see their car in the rear-view mirror, **ABT** also “decorated” the interior with letterings and embroidery that are as discreet as they are tasteful. Carbon-shift paddles and LED-shifting lights on the steering wheel help finding the perfect gear shift moment.

ABT Sportsline at the Geneva Motor Show 2014

When: 06.03. – 16.03.2014

Where: Hall 1.0, Booth 1244
