

ABT Sportsline – Press release Essen Motor Show 2015 XXL power – the ABT Sportsline-tuned Audi TTS with 400 hp

Performance-hungry drivers for whom the new Audi TTS's 310 hp/ 228 kW are not enough can now be helped in a very pleasurable way. **ABT** is showing mercy with the supposedly weak and presents an XL performance injection up to 370 HP/ 272 kW and 400 HP/ 294 kW. "We also increase the maximum torque from 380 up to 480 Nm," says an enthusiastic CEO **Hans-Jürgen Abt**. And they are offering the counterpart in form of a 6-piston sport-type braking system for the front axle as well. If your TT only has the basic engine with 230 hp/169 kW, don't worry: **ABT Power** provides it with 310 hp/228 kW and a torque of 440, up from 370 Nm.

Incidentally, even bends will hardly slow down the **ABT TTS**. And no wonder, given its **ABT** sport-type sway bars... 24 or 30 mm wheel spacers make for some extra dynamism, also in visual terms. Speaking of which: why not try the new glossy, matte, pearl or metallic car-wraps? And **ABT Sportsline** accentuates the edgy face of the TT with a front skirt add on with an offset spoiler lip. Specially designed mirror caps complete the front. Whoever sees the **ABT TT** in their rear-view mirror will soon only see its new rear, anyway. The fixed spoiler and skirt insert with its offset centre make the back of the car look much racier, an effect underscored by the **ABT** muffler system with its four black-chrome-plated tailpipes. You can also get a Y-pipe with a sport-type catalytic converter and ECE approval.

The car is perfectly connected with the road by the new **ABT FR** alloy wheels or the **DR**, **ER-C** and **CR** wheels – in 18, 19 or 20", depending on the model, with Continental sports tyres.

ABT Sportsline at the Essen Motor Show 2015

When: 27.11. – 06.12.2015

Where: Hall 3, Booth A155
