

ABT Sportsline 2014 – Press release CW34 **Golf R for Pros – ABT Power gives Generation VII up to 400 hp**

With a maximum drive speed of more than 300 kph, golf is one of the fastest ball sports ever. If you want a similarly fast “Golf car”, you have to go no further than **ABT Sportsline**. The Golf VII R, with a respectable “handicap” to begin with, after a visit to the “Bavarian Driving Range” features 400 hp / 294 kW, one third up from its serial 300 hp / 221 kW. “To top our previous uprating to 370 hp, we have not only optimised the **ABT Engine Control** software but also installed a sport-type catalytic converter,” says CEO Hans-Jürgen Abt. Both the **ABT Power** and the new, strong **ABT Power S** kit are based upon the specially developed “New Generation” **ABT control unit**, which guarantees maximum power and utmost dependability. This has been proven on our own dynamometer and on public roads.

All you need now is the right driver and outfit. The **ABT-tuned** Golf VII R, a real “pro”, features high-quality attachment parts, which much distinguish it from the serial version, e.g. a painted **ABT front grille** and the right headlight covers. Mighty side skirts signal other drivers that a fast car is approaching. An **ABT height adjustable suspension kit** will make the car always maintain its lane, even at high speeds. However, when you want to show others this Golf’s nice rear, do it in a “fair way”.

The **ABT tail gate add-on** is also worth a closer look. But even more impressive are possibly the four mighty exhaust pipes of a diameter of 101mm, which is roughly the size of a golf hole. These are part of the **ABT exhaust system**, which comes with a pre-silencer and axle back exhaust and makes for a good uprating and sound. And you can also choose from a number of **ABT Sportsline** alloy wheels and complete sets of wheels with tyres from 18 to 20 inches. Moreover, the rim designs **ER-C**, **DR** and **CR** are available in various finishes.
