

## **ABT Sportsline 2019 – Press Release CW 51**

### **Giant in Seven-League Boots ABT coaxes a confident 510 hp from the SQ7 – widebody kit planned**

Following a late summer facelift, the Audi SQ7 is now even more attractive. Engine-wise, the slightly modified standard V8 diesel still delivers 435 hp (320 kW) and 900 Nm. However, **ABT Sportsline** dares to up the ante and offer the proud customer the option of a steadfast 510 hp (375 kW), whereby the maximum torque is boosted to 970 Nm. With sports air suspension and progressive steering as standard, the SQ7 with **ABT Power** performance upgrade delivers superior handling at all times. "The engine and platform have plenty in reserve, providing both impressive power and excellent driveability," explains **CEO Hans-Jürgen Abt**. His company has recently launched an upgrade for the SQ8 with identical specification.

The perfect tuning of the high-tech control unit **ABT Engine Control** (AEC) of course also plays a part and guarantees driving pleasure without remorse. In addition, **ABT Sound Control** is available for models with factory-fitted active sound system, to create a charismatic individual vehicle sound. If you would like your **ABT SQ7** to be instantly recognisable, in 2020 you can pre-order the aerodynamic widebody kit that is currently under intensive development.

Matching **ABT Sports Wheels** are already available in three different 22-inch variants, namely the **Sport GR** in glossy black or matt black, the **HR Aero** in dark smoke and the flow-forming high-performance **HR-F** in shadow silver. Select your preferred individual combination from these and many other visual finishing options with the **ABT Configurator**. There are also several interior finishing options available, such as the **ABT Start-Stop Switch Cap** with illuminated logo or **ABT Door Entry Lighting**.
