

## ABT Sportslines 2018 – press release CW35

### ABT POWER DAYS: Extra power for Audi, VW, SEAT and Skoda 20 % cheaper

When the outside temperatures start dropping again, driving fun will reach new heights at the beginning of the fall. From September 13 to 25, **ABT Sportslines** will be celebrating the **ABT POWER DAYS** again, which in turn makes installing one of the power boost kits from Bavaria even more desirable. During this time, the price will drop by an attractive 20 %. Audi A7 Sportback (up to 425 HP/313 kW), VW T6 (up to 240 HP/176 kW), SEAT Leon (up to 370 HP/272 kW) and Skoda Kodiaq (up to 216 HP/159 kW) are just a small selection of vehicles which have been featured in the media recently. All in all, the boost kits **ABT Power** are available for a large number of cars from the Audi, VW, Skoda and SEAT range – whether brand-new or a bit older, either with gasoline or diesel engines.

At the heart of this package is the specially developed **ABT Engine Control (AEC)** unit. A suitable power increase can be configured on the **ABT Power site**. In addition to the actual power and torque increase, the primary features of the engine upgrade from **ABT Sportslines** are the careful testing, the excellent quality and the extensive warranties. Whether owners of new or used cars – **ABT customers** are fully covered. **ABT** grants a two year warranty to the extent of the factory warranty on new cars with **ABT Power boost**. For used cars, there is the option extending the warranty by 1, 2, or 3 years for a fixed price. In addition, customers can choose an optional **ABT follow-up** or **used car warranty**.

The lucrative offer of the **ABT POWER DAYS** will be available at the headquarters in Kempten and at over 100 participating **ABT partners** throughout Germany. Furthermore, it will be provided at official **ABT dealers** in Austria, Switzerland, the Netherlands, Luxembourg, Belgium, Poland and Hungary. Details on the offer and the online configurator can be found on the **ABT website**.
