

ABT Sportsline 2018 – Press Release CW50

VW Touareg III: 22 inch GR rim and 330 HP thanks to ABT Power

While some of the Touareg people have now settled, their namesake from Volkswagen is still as adventurous and fiery as ever. Thanks to **ABT Power**, the VW Touareg III is even more agile and additionally receives matching the top-of-the-line 22 inch **ABT SPORT GR** rims. **ABT Sportsline** also offers DR, ER-C and FR-C rims in different sizes for the German SUV. "Since its market launch in 2002, the VW Touareg has been a regular at **ABT Sportsline**," emphasizes CEO Hans-Jürgen Abt, "and the power boost and alloy wheels once again add driving pleasure and sportiness to the third generation."

The power boost, which is individually developed at **ABT Sportsline** for each engine, offers added performance as well as optimum protection for the engine. The specially developed **ABT Engine Control** (AEC) unit continuously adjusts a large number of measurement data to ensure optimum power delivery. Instead of 286 HP (210 kW) and 600 Nm in the production version, **ABT Power** now provides the 3.0-liter TDI in the Touareg with 330 HP (243 kW) and 650 Nm.

To match the added power of the SUV, the **ABT Sportsline** range offers numerous sporty alloy rims in 20 and 22 inch. The top-of-the-line model **ABT SPORT GR** in 22 inch and the colors matt black or glossy black is always an eyecatcher. The athletically styled wheels have not an ounce of unnecessary weight and feature a strong concave rim base.

The **ABT Sportsline** product range for the VW Touareg is completed by the **ABT integrated entrance lights**. The replacement for the standard lights in the driver and passenger doors projects the **ABT logo** onto the asphalt whenever the doors are opened. The SUV leaves **ABT Sportsline** with an even more sporty and versatile performance and look – after all, the all-rounder is also used as a travel and transport vehicle that can always use a little extra dynamics.
