

ABT Sportsline 2021 – Press Release – Week 33

Compact sports car with more power and a new look ABT provides a boost of 60 HP and new wheels for the CUPRA Leon

Since the first generation appeared in 1999, the Leon has enjoyed ongoing success in the dynamic compact class. Hitherto under the banner of SEAT, sporty models of the fourth and latest edition bear the bronze-coloured CUPRA emblem. And this can be interpreted as a sign of commitment. After all, the still relatively young brand has also dedicated itself to racing – as shown not least by the recent performance of the joint **ABT CUPRA XE** team in the Extreme E series. But back to the road: From the factory, the 2.0 TSI Leon VZ hatchback delivers a hefty 300 HP (221 kW) and 400 Nm. The all-wheel drive VZ Sportstourer delivers 310 HP (228 kW) and 400 Nm. This provides a good platform from which the engineers at **ABT Sportsline** have been able to give the Spaniard even more fuego. With the **ABT Power** performance upgrade*, the data sheet now boasts a substantial 360 HP (265 kW) for the hatchback and 370 HP (272 kW) for the Sportstourer, each with 450 Nm.

Of course, the world's largest automotive aftermarket and performance parts specialist for Audi and VW offers more for the aspiring compact car than a pure performance upgrade. For even sportier road holding, the Bavarian company also provides **ABT suspension springs**, which facilitate lowering of up to 30 mm all round. To create a more individual look, 20-inch **ABT Sport GR** wheels are available in matt or glossy black. These also feature in an attractive package that the Bavarians have compiled for the Leon: It also includes the aforementioned **ABT Power** performance upgrade to 360 or 370 HP and the **suspension springs**. The total price for this package amounts to EUR 5,990 including VAT, plus costs for installation and TÜV. For the latest additional options for the CUPRA Leon, please visit the **ABT Configurator**.

*The engine performance data is in accordance with the stipulations of EWG/80/1269. The process and dynamometer manufacturer have been certified and authorised by the vehicle manufacturer. For further details, visit www.abt-sportsline.com/performance-measurement.
