

## ABT e-Line 2020 – Press Release CW 11

### **Latest generation of the “Electro-Bulli” ABT e-Transporter 6.1 is available to order now**

Along with the **ABT e-Caddy**, the new **ABT e-Transporter 6.1** is available to order right now at selected dealers of Volkswagen Commercial Vehicles (VWCV) and via **ABT e-Line Partners**. The vehicle is available in right and left-hand drive versions, all with the long wheelbase. This provides the optimum load capacity of 6.7 m<sup>3</sup>. As such, it is perfectly suited to professional conversion, with a universal floor and full cupboard or workshop system. The Kombi or Caravelle transports up to nine people. The maximum load capacity ranges from 977 to 1,096 kg. With a trailer, the total combined load weight increases to 3,770 kg. Unbraked trailer loads of up to 750 kg are possible. **ABT e-Line** is an official premium partner of VW Commercial Vehicles, and is responsible for conversion of the VW T6.1 to electric operation, just like it was for its predecessor.

Depending on specification, the **ABT e-Transporter 6.1** has a range of up to 138 km (according to WLTP). Battery capacity is 37.3 kWh gross or 32.5 kWh net. Maximum output is 83 kW at a maximum torque of 200 Nm. The battery weighs 333 kg. The vehicle is available with top speed options of either 90 km/h or 120 km/h. Their respective ranges according to WLTP are between 105 and 138 km for a fully charged battery. Power consumption is between 27.0 and 35.8 kWh/100 km. The **ABT e-Transporter 6.1** can be fully charged in approximately 5.5 hours via a 7.2-kW AC-wallbox. A 50 kW rapid charging station (CCS) charges to 80 percent of capacity in approximately 45 minutes.

Along with the available models, the key to the breakthrough of electro-mobility is an optimally usable charging infrastructure. With **e-Charge**, VW Commercial Vehicles provides **ABT e-Transporter** or **e-Caddy** users with exactly that: cashless access to one of the largest charging networks worldwide.
